

KEEPS YOUR CITY CLEAN.

First impressions count. This does not only apply to people but also to towns, cities and municipalities. Neat and tidy public green areas, roads and paths do not only contribute to a good image for visitors and the local inhabitants, but are also a sign of a council which works perfectly. And they encourage people to keep the city clean and tidy. As far as cleaning is concerned, many details and secondary effects are important, especially as viewed by a critical public.

For many years now, Green Machines have aimed to contribute decisively towards cleaner and tidier towns and cities by providing efficient and sophisticated sweeping machines. We have managed to enhance the performance

of all Green Machines with conventional drive systems thanks to a host of clever details. For a city, its inhabitants, the environment and for all those who handle it on a daily basis. Welcome to Green Machines!

No chance for dust and dirt.

In busy city centres, in car-parks and other outdoor areas requiring professional sweeping, the 636 leaves only one thing: a positive impression. By reducing water consumption considerably and with its sophisticated design details, it cuts labour and maintenance costs.

FINE DUST HUNTER AND GATHERER.

🔶 Green Machines —

A really special sweeper.

→ **6**17

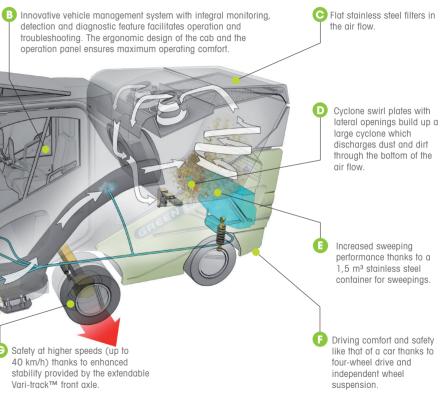

→ 636

Enhanced safety thanks to panoramic view. Straightforward operation and troubleshooting with integral system monitoring. Real-time information for operators and mechanics via integrated LCD screen.

Improved productivity thanks to intelligent single-button change-over feature between sweeping and transit mode

Two independently operated brushes for efficient sweeping, even around obstacles. The brush pressure can be controlled individually from the cab, depending on the surface quality in question.

G Safety at higher speeds (up to 40 km/h) thanks to enhanced stability provided by the extendable Vari-track[™] front axle.

TECHNICAL SPECIFICATIONS.

636

SWEEPING SYSTEM

Working width: minimum (brushes retracted)	1,300 mm
Maximum (brushes extended completely)	2,050 mm
Capacity of container for sweepings	1.5 m ³
Material of container for sweepings	stainless steel

DUST CONTROL SYSTEM

Dust filtering Stage 1:

Stage 2:

Stage 3: Dust control system CloudMaker[®] Vacuum impeller

DRIVE SYSTEM

Standard enaine
